

# Macquarie Fortress Fund

## Interim Investment Update

---

31 October 2008

Macquarie Financial Products Management Limited (as responsible entity for the Macquarie Fortress Fund) (MFPML) wishes to advise that the net asset value (NAV) as at 30 September 2008 was 27.2 cents per Unit. This NAV has not been audited.

As previously disclosed, the deterioration in global financial markets has continued to affect the traded prices of US Senior Secured Loans (Senior Loans) in the Fortress portfolio. Presently, the cumulative market value of Senior Loans in the Fortress portfolio is below the total debt facility balance. As a result, MFPML estimates that as at 30 October 2008 the NAV remains zero cents per Unit.

Despite the above, even in the event that there is ultimately a shortfall between the total debt facility balance and the cumulative realised value of Senior Loans in the Fortress portfolio, holders of Macquarie Fortress Fund Units will not be required to fund this shortfall.

As previously notified, the refinancing arrangement concluded in April 2008 is committed for 8 years until 2016 and does not incorporate any market value based repayment triggers. Under this arrangement, the finance provider has no rights to require an accelerated repayment of the debt facility. The final return to investors continues to depend on default and recovery rates of Senior Loans in the Fortress portfolio. Furthermore, there have been no new defaults in the Fortress portfolio.
